14. Mandibles of Perameles, Procyon, and Otocyon, viewed from behind, p. 263.
16. Cheek-teeth of the same, p. 239.

April 20, 1880.

Professor W. H. Flower, LL.D., F.R.S., President, in the Chair.

The Secretary made the following report on the additions to the Society's Menagerie during March 1880:

The total number of registered additions to the Society's Menagerie during the month of March was 97, of which 10 were by birth, 30 by presentation, 34 by purchase, 16 received in exchange, and 7 received on deposit. The total number of departures during the same period, by death and removals, was 97.

The most noticeable addition during the month was:

A pair of Spanish Ichneumons (Herpestes widdringtoni) from Andalusia, presented by J. C. Forster, Esq., F.Z.S., March 19.

Prof. Owen, C.B., F.R.S., read descriptions of various new and little-known species of Cephalopoda, amongst which was a new generic form proposed to be called Tritaxeopus.

This paper will be published in the Society's 'Transactions.'

Dr. M. Watson read an account of the female organs of the Proboscidea, as observed in a specimen of the Indian Elephant which he had lately dissected.

This paper will be published in the Society's 'Transactions.'

The following papers were read:
